- Download and save to the USB stick.

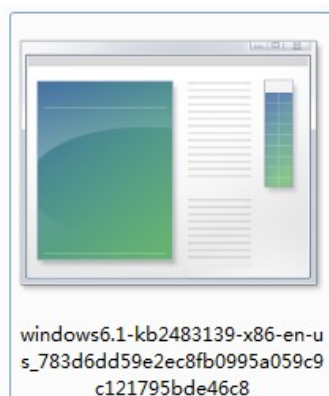

Step 2: Remove the rear panel of PC, and insert near USB dongle (Please be careful, don't change, remove or touch other cables or devices):

Step 3: Install this English language package and change the language in the control panel setting:

Step 3-1: Find the installation pack in the USB disk:

SINO GOOKII TECH CO.,LTD.

Step 3-2: Double-click the installation package to pop up this file:

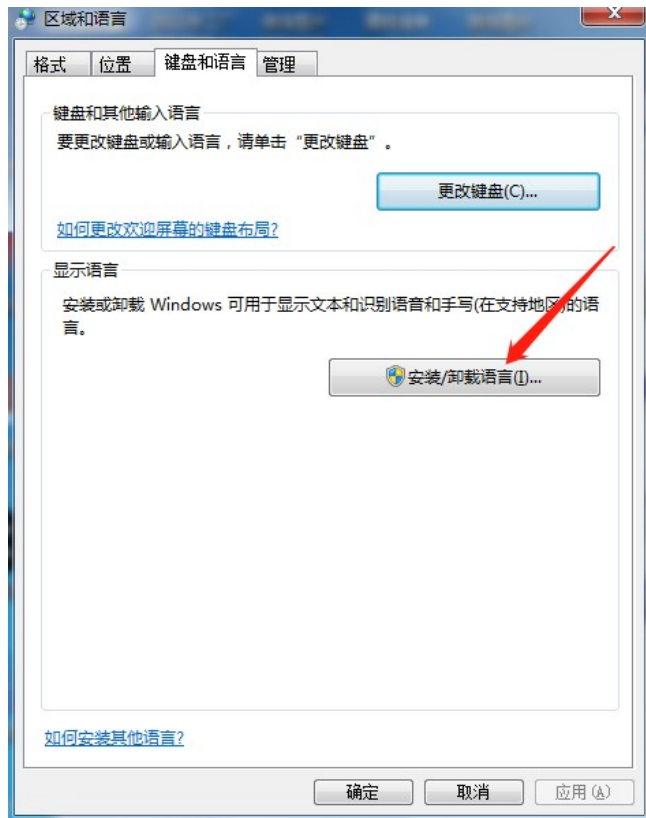

Step 3-3: Click the Control Panel Setting:

Step 3-4: Select the “Time, Region and Language”, Select the “Keyboards and Language” tab:

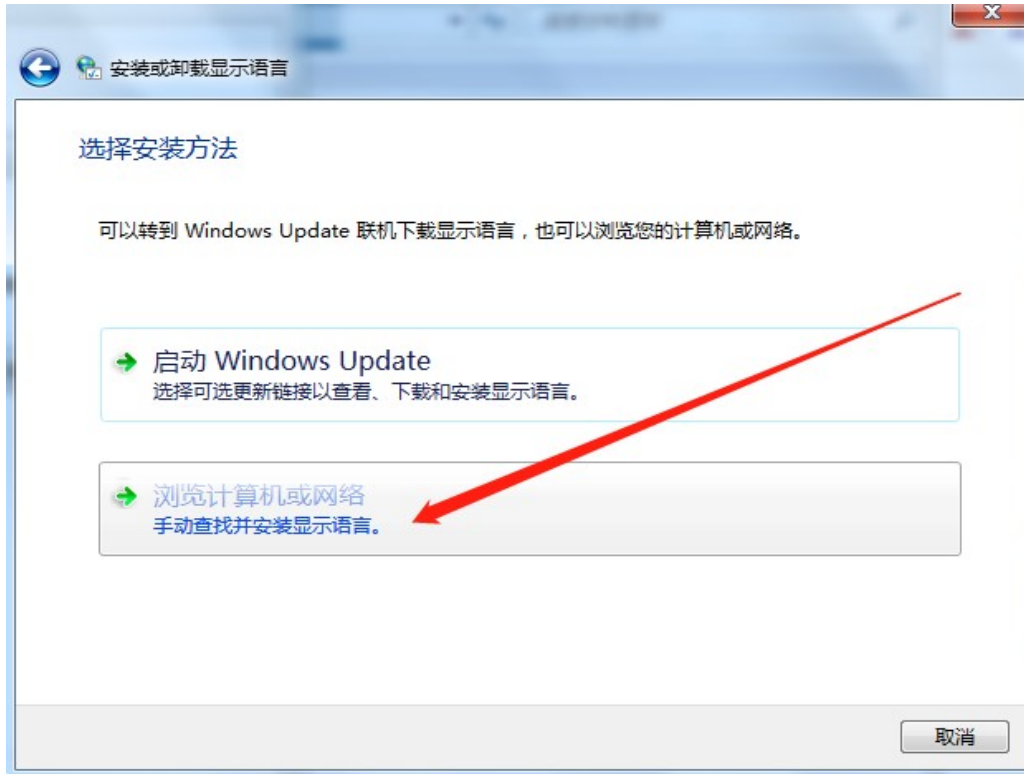

Step 3-5: Select the “Install/uninstall languages” tab:

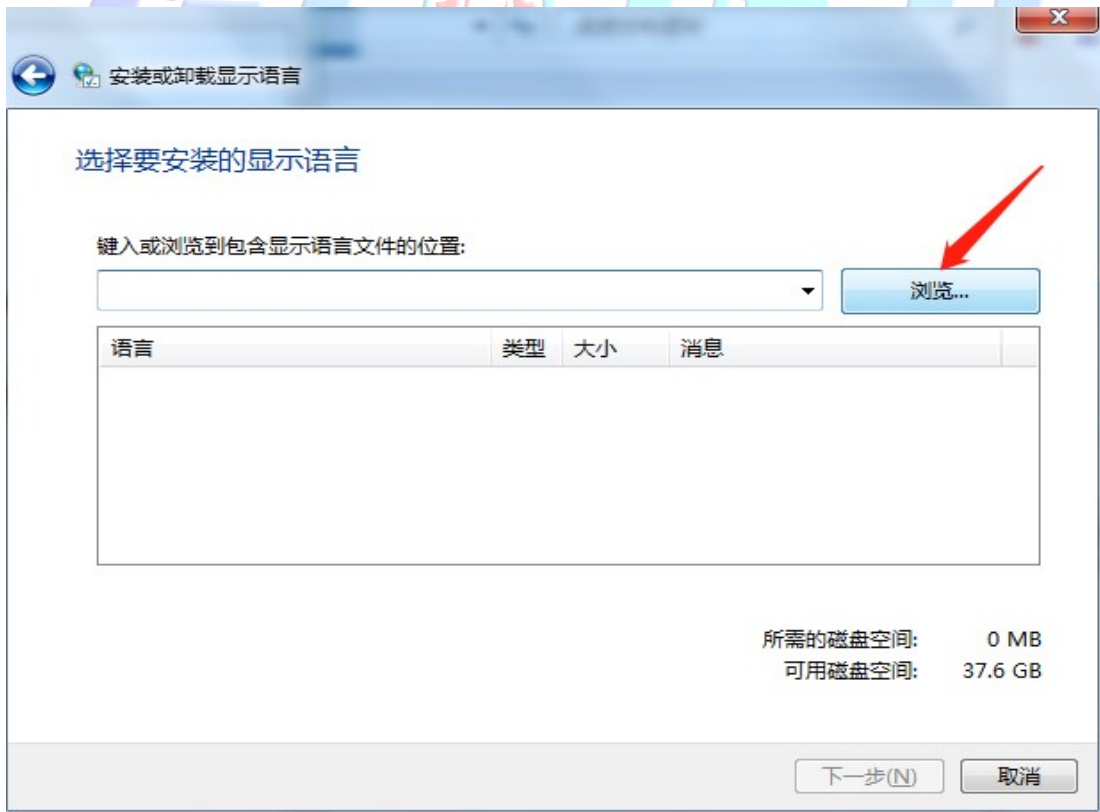

Step 3-6: Select the “Choose a display language” tab:

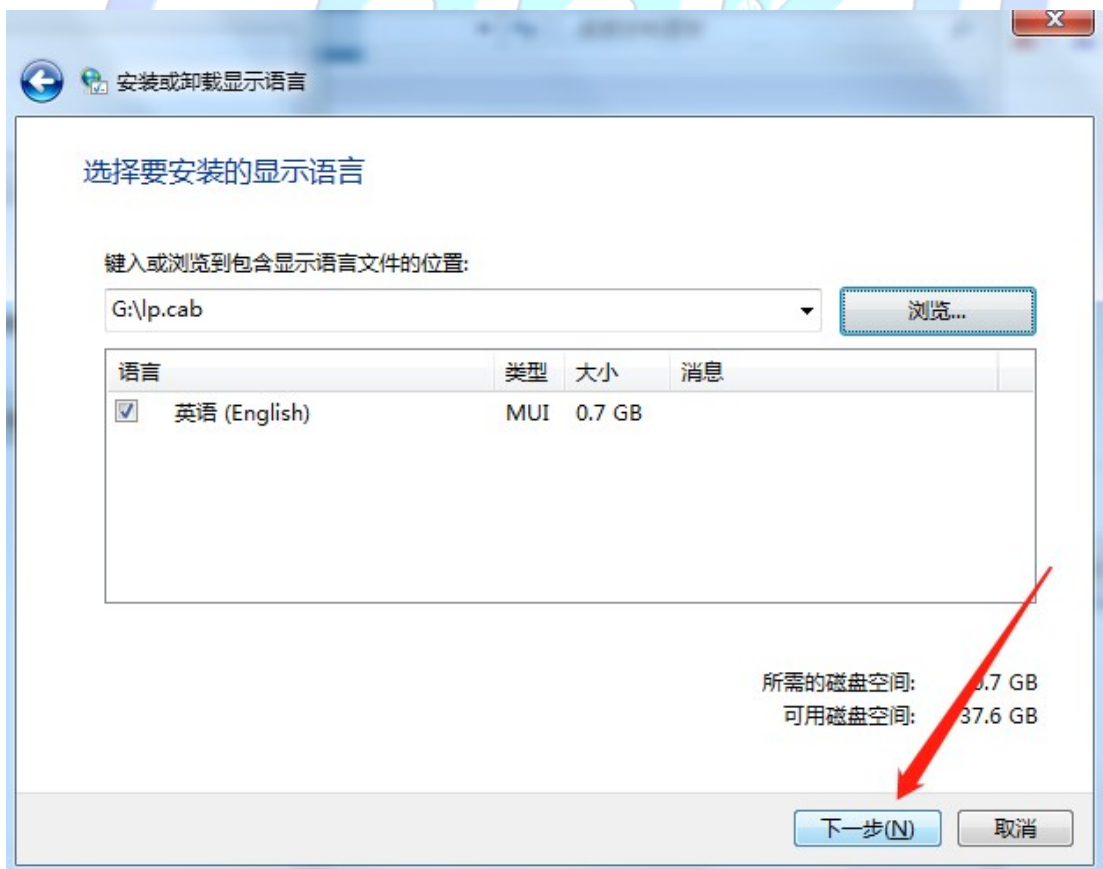

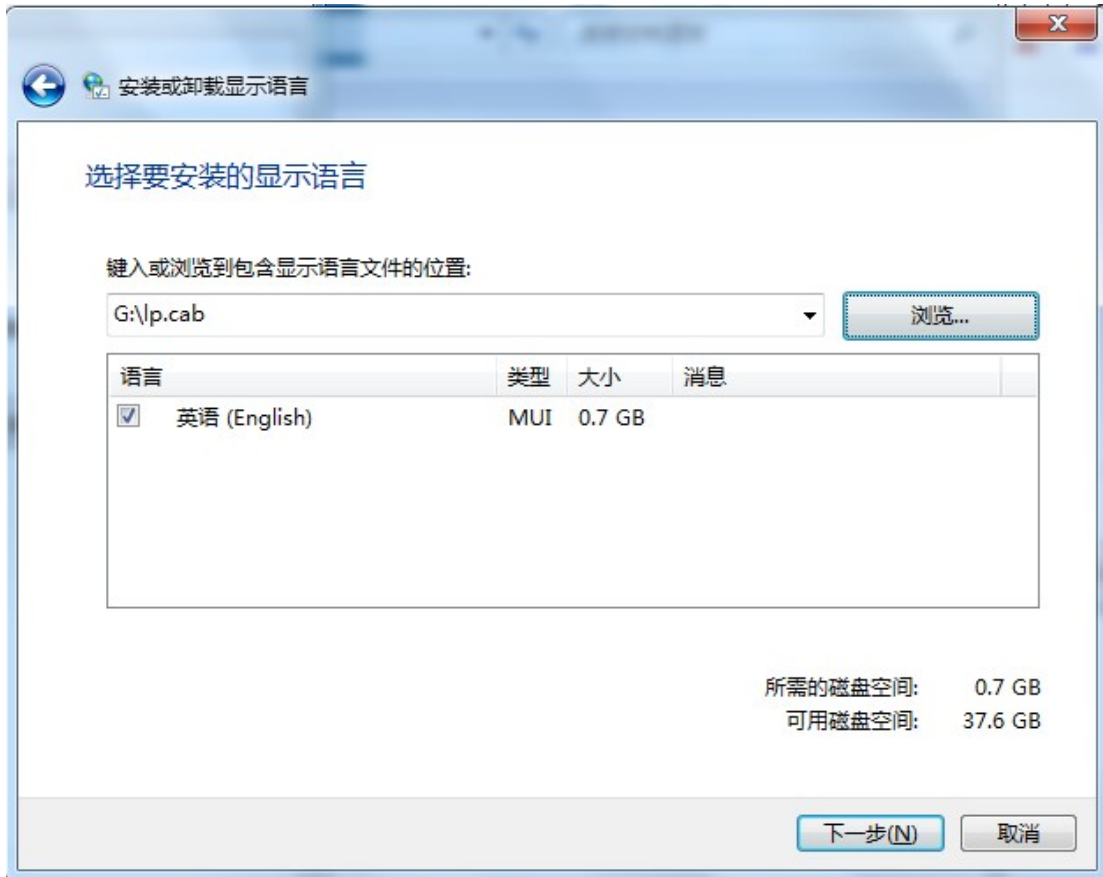

Step 3-7: Select the “Browse computer or network” tab:

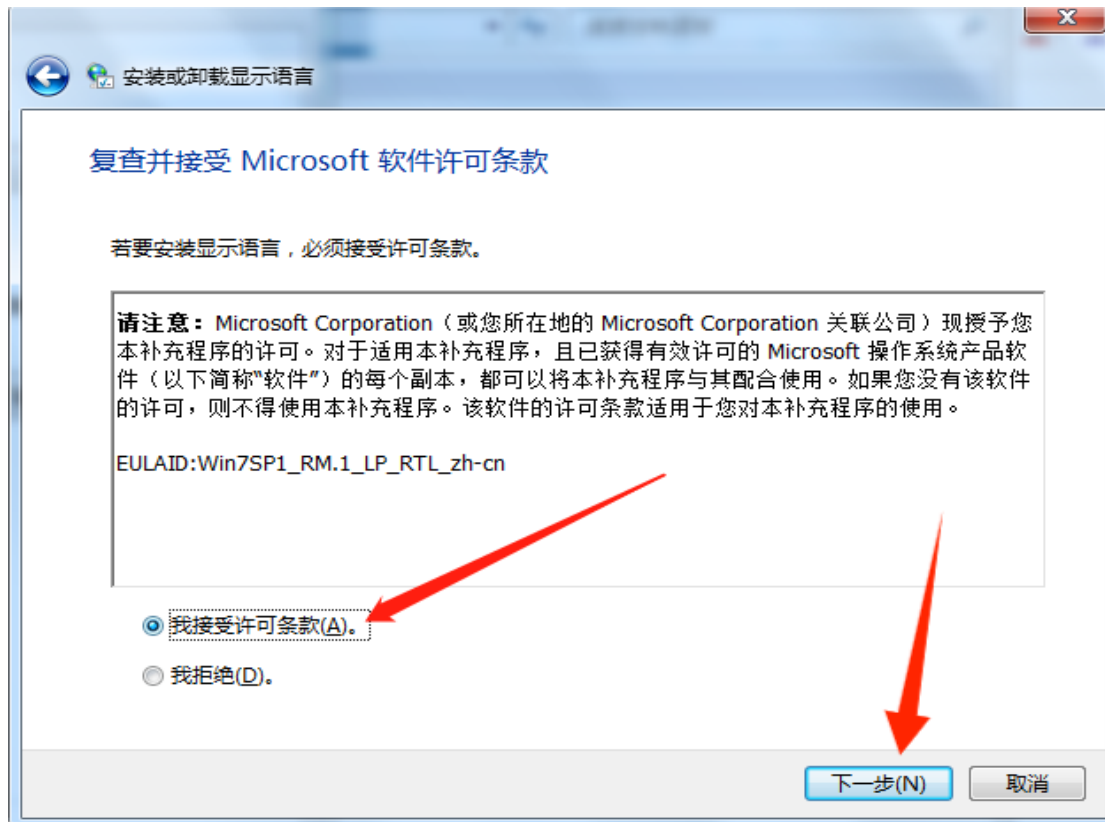

Step 3-8: Select “Browse” tab, find the installation pack, click “Next” tab:

Step 3-9: Select the “Accept Condition” tab, click “Next” tab, wait until the installation is complete (About 6 to 10 minutes):

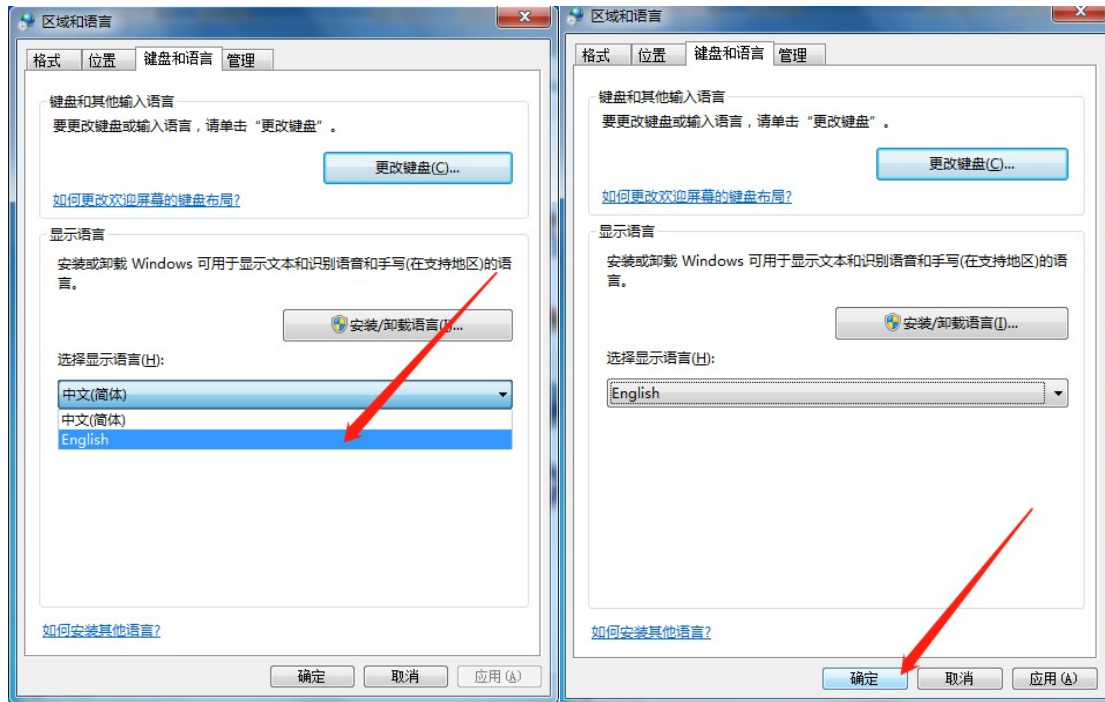

Step 3-10: Click the Control Panel Setting:

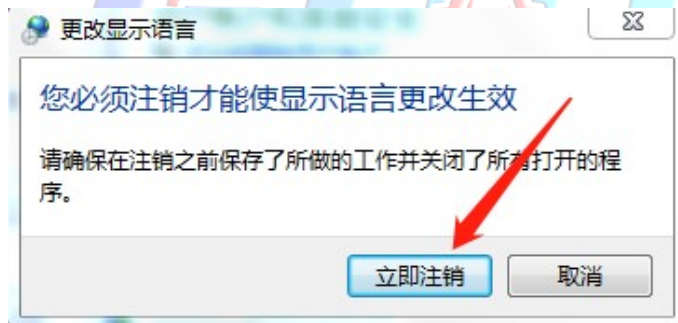

Step 3-11: Select the “Time, Region and Language”, Select the “Change Display Language” tab:

Step 3-12: Select English language from the Display Language drop-down menu, click “Confirm” or “Apply”(A):

Step 3-13: Select “Log out now” tab:

Step 3-14: After the computer restarts, the language conversion is complete.
